

ISO 39001

Road traffic safety (RTS) management systems

MOTIVATION AND BENEFITS

ISO 39001 is an international standard and specifies the requirements for road traffic safety (RTS) management systems.

The safety of personnel involved in road traffic is an increasing challenge for organizations of all types due to its rising complexity. A systematic management system as described in ISO 39001, allows to define the minimum organizational requirements for road traffic safety. The objective of ISO 39001 is the reduction of negative incidents in organizations caused by road traffic. With the introduction of a management system according to ISO 39001 and a corresponding certification, organizations demonstrate the importance of these objectives towards stakeholders and show that road traffic safety is taken seriously.

Every organization that wants to improve its road traffic safety as well as the employees participating in road traffic will benefit from the implementation of ISO 39001.

ISO 39001 is suitable for organizations of any size and can help to manage the particular challenges of safety in road traffic that organizations are confronted with.

The standard is based on the High Level Structure (HLS) and can therefore be fully integrated into existing management systems, such as ISO 9001.

The following topics are covered:

- ISO 39001 helps organisations to know and control their road transport systems.
- It confirms that the organisation has the necessary means to reduce or eliminate the risk of fatalities and serious injuries.
- The ISO 39001 standard is designed to help your organisation implement road safety best practice.
- This standard promotes the application of the P-D-C-A (Plan, Do Check, Act) cycle process approach.

OBJECTIVES

- Increase the organization's road traffic safety performance
- Reduction of road crashes
- Improvement of working environment, leading to higher employee satisfaction
- Improved achievement of corporate security and social responsibility objectives
- Safe and effective transport
- Identification of opportunities to improve efficiency through better route management
- Increase of safety for all road users
- Cost reduction due to increased efficiency
- Creation of a voluntary and complementary tool to legislation, aimed at all organizations interacting with road transport and driven by the needs of interested parties, including market forces

- An approach to the use and dissemination of „best practice“
- Knowledge transfer from road safety experts to the intended users of the standard

TARGET GROUP

Private and public organizations that interact with the road traffic system

OTHER RELEVANT STANDARDS

ISO 9001, ISO 14001, ISO 45001

QUALITY AUSTRIA – WHO WE ARE

We are the leading Austrian contact for the Integrated Management System, based on quality, environmental and OH&S (occupational health and safety) management, and the topic of business excellence. Our main focuses are system and product certification, training and personal certification. We are accredited by Accreditation Austria for system, product as well as personal certification and have many international registrations and accreditations. Furthermore, we present the Austrian Excellence Award together with the BMWA (Federal Ministry for Economy and Work) and award the Austria Quality Seal.

Additionally, we organize several forums and conferences and have issued numerous publications. We participate actively in standardization bodies and international networks such as EOQ, IQNET and EFQM. We cooperate with some 50 partner and member organizations worldwide and thus ensure the facilitation of global know-how.

Having more than 1.000 auditors, trainers, assessors and technical experts all over the world, we ensure the successful implementation of standards and regulations within the organizations and provide sector and product specific knowledge with a very high focus on practical relevance. More than 10.000 customers in approx. 30 countries and over 6.000 annual participants in our trainings benefit from the long-standing expertise of our organization. We adapt our offer according to our clients' needs and support them in achieving their long-term goals!
