

ISO 45001

Occupational Health & Safety Management System

MOTIVATION AND BENEFITS

The implementation of this norm ensures the systematization of safety related activities and the optimization of processes. Additionally, it helps to achieve a structured improvement of legal compliance and framework conditions due to the use of transparent systems for persons responsible, representatives and managers.

The awareness of Occupational Health & Safety (OH&S) risks is reinforced and legal requirements regarding OH&S are verifiably met. There is an open information policy in terms of the development of OH&S and a continuous improvement of occupational safety and health protection is achieved. Processes are reviewed systematically and measures are defined, implemented, monitored and assessed.

An organization certified according to ISO 45001 inspires higher confidence in customers, suppliers, employees, authorities and investors. Many specifications of ISO 45001 are similar to legal requirements. Therefore, ISO 45001 supports every ambitious organization in increasing its corporate legal certainty.

ISO 45001 is based on the ISO High Level Structure and can be combined efficiently with other standards such as ISO 9001 and ISO 14001 due to the same structure and format. The norm is very much aligned with the aspect of (risk based) prevention.

OBJECTIVES

- Establishing an OH&S management system in order to minimize risks towards employees and other interested parties, who might be exposed to OH&S risks in connection with the organization
- Continuous improvement of an OH&S management system
- Demonstrable conformity with the organization's own OH&S policy
- Communicating this conformity to outside parties
- Certification / registration of the OH&S management system by an external organization
- Determining the organization's own OH&S level and declaring conformity with the existing specifications of the OH&S management system

TARGET GROUP

Suitable for organizations in trade and industry, service providers, social institutions, public and municipal sectors as well as rail companies.

CRITERIA

The management system ISO 45001 includes requirements for OH&S management systems, which help organizations to manage their OH&S risks and to improve their performance. The specifications of the OH&S management system can be applied by any organization. All conditions stated in the ISO 45001 Standard are meant to be included in an OH&S management system. The extent to which they are used depends on various factors such as the company's corporate policy, the organization's activities, the risks and the complexity of the operations and processes.

In order to be certified according to ISO 45001, an organization must fulfil the following criteria:

- determining the relevant context of the organization in connection with OH&S and health protection
- conducting a risk and chance analysis
- establishing a plan and setting goals to improve the organization's OH&S and health protection performance
- integrating the requirements in the business processes
- internal auditing and periodic management review of the system

ACCREDITATION

Quality Austria - Trainings, Zertifizierungs und Begutachtungs GmbH is accredited for certifying organizations acc. to ISO 45001 as of April 2018.

OTHER RELEVANT STANDARDS

ISO 9001, ISO 14001, SCP, SCC, AUVA SGM, EN 13816, Rail safety according to article 9 of Directive (EU) 2016/798 (2004/49)

QUALITY AUSTRIA – WHO WE ARE

We are the leading Austrian contact for the Integrated Management System, based on quality, environmental and OH&S (occupational health and safety) management, and the topic of business excellence. Our main focuses are system and product certification, training and personal certification. We are accredited by Accreditation Austria for system, product as well as personal certification and have many international registrations and accreditations. Furthermore, we present the Austrian Excellence Award together with the BMWA (Federal Ministry for Economy and Work) and award the Austria Quality Seal.

Additionally, we organize several forums and conferences and have issued numerous publications. We participate actively in standardization bodies and international networks such as EOQ, IQNET and EFQM. We cooperate with some 50 partner and member organizations worldwide and thus ensure the facilitation of global know-how.

Having more than 1.000 auditors, trainers, assessors and technical experts all over the world, we ensure the successful implementation of standards and regulations within the organizations and provide sector and product specific knowledge with a very high focus on practical relevance. More than 10.000 customers in approx. 30 countries and over 6.000 annual participants in our trainings benefit from the long-standing expertise of our organization. We adapt our offer according to our clients' needs and support them in achieving their long-term goals!
