

National Qualifications Framework

Assignments to the National Qualification Framework for the NQR in Austria

MOTIVATION AND BENEFITS

The National Qualification Framework (NQF) in Austria is an instrument for the classification of qualifications into eight levels.

Each level is characterized by different descriptors. These descriptors are formulated in a general manner that refer to learning outcomes. These outcomes are based on knowledge, skills and competencies.

A qualification according to the NQF is assigned to the same qualification level of the European Qualifications Framework for Lifelong Learning (EQF). This makes Austrian qualifications more comparable throughout Europe. The NQF-Act was adopted in 2016 and forms the legal framework on a national level.

REQUIREMENTS

A prerequisite for assigning a qualification to the NQF is a reference request. This request is sent by Quality Austria - Trainings, Zertifizierungs und Begutachtungs GmbH to the NQF National Coordination Body (NCB). Subsequently the request is reviewed and decided upon by the NQF committees.

OUR OFFER

In an initial meeting at no charge, we are pleased to present the possibilities within the framework to the NQF. We offer two different packages:

Basic package

- **Evaluation of your reference request:** This is an electronic form that needs to be completed and submitted with all enclosures (legal frameworks, curricula, binding description of qualifications etc.). In this request, applicants must provide precise information on the qualifications (especially on the learning outcomes) and the determination procedure. Additionally, the applicant needs to state the steps taken for quality assurance of the determination procedure. Furthermore, the referencing to one of the NQF qualification levels needs to be justified.
- **Feedback talk**
- **Submission of the assignment request**

Additional package

- **Support during preparation of the assignment request:** We support you in formulating your application or provide you with tips which parts of your application need further development in order to meet the criteria of the desired NQF reference levels.

TARGET GROUP

Provider of qualifications in the training and further education sector

BENEFITS OF ASSIGNING A QUALIFICATION

All stakeholders in the education process can benefit from the classification:

Education and training institutions:

- Classification to the NQF is accompanied by quality control of all aspects of education and training. Thus new stimuli can be gained for further development.

- Other education and training institutions can use the NQF classification as criterion for admissions and (partial) crediting of qualifications.

Employers:

- The NQF classification can help in personnel recruiting decisions as the qualification of employees is demonstrated adequately.
- By classifying a qualification to the NQF, it becomes transparent which skills, knowledge and competencies graduates of education and training programmes have.
- Contents of the NQF competence framework can be used for job descriptions and job profiles.
- Comparability of different qualifications and degrees is simplified

Graduates of education and training programmes:

- It is an advantage for graduates to have a qualification classified to the NQF since the level of qualification is clearly described.
- Through transparent presentation of the participant's qualifications, graduates are geographically mobile in the European education and job market and can better outline their qualifications.

QUALITY AUSTRIA – WHO WE ARE

We are the leading Austrian contact for the Integrated Management System, based on quality, environmental and OH&S (occupational health and safety) management, and the topic of business excellence. Our main focuses are system and product certification, training and personal certification. We are accredited by Accreditation Austria for system, product as well as personal certification and have many international registrations and accreditations. Furthermore, we present the Austrian Excellence Award together with the BMWA (Federal Ministry for Economy and Work) and award the Austria Quality Seal.

Additionally, we organize several forums and conferences and have issued numerous publications. We participate actively in standardization bodies and international networks such as EOQ, IQNET and EFQM. We cooperate with some 50 partner and member organizations worldwide and thus ensure the facilitation of global know-how.

Having more than 1.000 auditors, trainers, assessors and technical experts all over the world, we ensure the successful implementation of standards and regulations within the organizations and provide sector and product specific knowledge with a very high focus on practical relevance. More than 10.000 customers in approx. 30 countries and over 6.000 annual participants in our trainings benefit from the long-standing expertise of our organization. We adapt our offer according to our clients' needs and support them in achieving their long-term goals!
