INTERNATIONAL TRAINING PROGRAM

We offer a variation of training programs, personal certifications and online courses in different fields. The training courses contained in this brochure are offered in English language as inhouse trainings, on demand virtually and partly as public trainings through selected **qualityaustria** partners.

Train for your success!

www.qualityaustria.com/international-trainings

Dear reader,

Faster, more dynamic, more complex – we live in a world of change and the last few years have shown how adaptive our society needs to be. Circumstances can change rapidly, and we are required to be both consistent as well as agile. This has an impact on many operational processes, fields of activity and responsibilities. Nevertheless, the human factor remains key for the success of every tool and system.

PLAYING WITH OPEN CARDS

Organizations are currently confronted with a variety of challenges. These include for example the increasing demand for transparency regarding sustainability due to the required ESG criteria. But the behaviour of consumers and employees is also evolving. All these challenges are an addition to the still beating factors such as the advancing digitalization, the change to Industry 4.0 or the strained cost framework. So how can you prepare yourself for a future in which the cards are constantly being reshuffled?

WE – THE PEOPLE – HAVE IT IN OUR HANDS

For an organization to survive at all in the face of fast-moving, variant diversity and increased competition, the combination of goals, procedures, processes, and other entrepreneurial elements into a system is crucial. On the one hand, a management system helps to address existing and new issues in a structured manner. Certified organizations are better prepared for difficult situations or make profits even in times of crisis. On the other hand, training and further education are essential, especially in dynamic times, and create stability as well as the necessary „view beyond one’s own nose“. We support you with a range of revised, new and proven trainings as well as personal certifications in various industries.

We would be delighted if you placed your trust in us and allowed us to accompany you on your path to success!

Cordially yours,

Christoph Mondl
CEO Quality Austria

Dr. Werner Paar
CEO Quality Austria

Your qualityaustria benefits

- We have the most extensive scope of accreditation in the field of management systems in Austria.
- We are a source of inspiration and an expert for the Integrated Management System.
- We are a center of competence through our participation in various ISO standardization bodies and international certification networks, such as IQNET, EFQM etc.
- We adjust the offer to our customers' needs and support them in focusing on long-term goals.

System Certification

acc. to ISO/IEC 17021-1

Personal Certification

acc. to ISO/IEC 17024

Product Certification

acc. to ISO/IEC 17065

PAY ATTENTION TO THE ACCREDITATION!

Quality Austria - Trainings, Zertifizierungs und Begutachtungs GmbH is accredited through the Federal Ministry for Labour and Economy in the areas of management systems acc. to ISO/IEC 17021-1, certification of persons acc. to ISO/IEC 17024 and certification of products acc. to ISO/IEC 17065.

Fairness, impartiality and validity of our procedures and certification programs are guaranteed and confirmed continuously. We have the broadest accreditation scope in Austria and as an accreditation body we are committed to ensure independence and objectivity.

qualityaustria certificates have an outstanding reputation and are an objective proof of competence due to their internationally accepted processes of examination, assessment and re-certification based on the ISO/IEC 17024 standard.

We offer more than 50 certification programs, most of them are nationally accredited.

More details regarding our accreditations and registrations can be found here:

www.qualityaustria.com/accreditation.

OUR TRAINING DESIGN FOCUSES ON YOUR COMPETENCE AS A KEY TO SUCCESS

The primary objective of our trainings is the increase of competence of all participants on a long-term basis.

This objective goes far beyond the mere imparting of knowledge and is supported by didactic and organizational measures. As for the contents, we put our focus on practice and value creation. Therefore, we combine the newest findings from studies, trend analyses, developments of standards and reports from practice with our practical know-how. With our webinars, online courses and information events we constantly aim to maximize value for our customers by staying on top of latest developments.

qualityaustria PERSONAL CERTIFICATES: RECOGNIZED WORLDWIDE

Due to our accreditation **qualityaustria** personal certificates are recognized worldwide.

You can therefore benefit not only in Austria but worldwide from a qualityaustria personal certificate.

qualityaustria personal certificate

qualityaustria BONUS SYSTEM

Benefit from our bonus system for system certification as well as certification of persons! The **qualityaustria** bonus system offers the following options: pioneer bonus, corporation bonus, group bonus, early bird bonus and competence certificate bonus. For further information, please refer to www.qualityaustria.com/en/bonus.

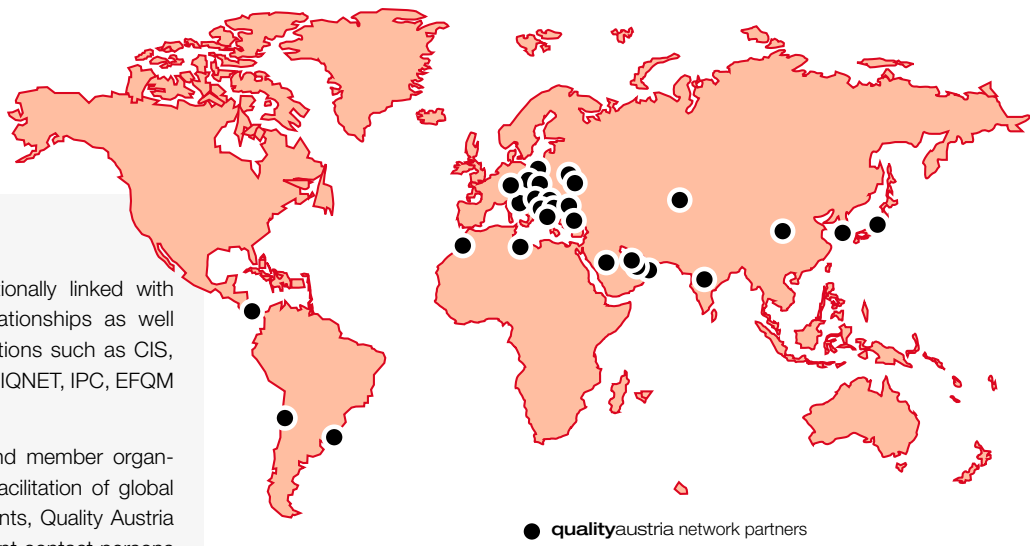

OUR AUDIT PHILOSOPHY: BENEFITS AND VALUE

From the beginning, the qualityaustria audit design has been focused on creating value for our customers.

- Customer expectations significantly influence audit objectives and benefits.
- Auditor competence is of extreme importance.
- Performance and effect of the audited Integrated Management System is crucial.
- People meet each other during an audit.
- Auditing with the right attitude and values leads to the desired audit quality.

Characteristics such as independence, transparency, comprehensibility, professional due diligence, factual illustration, integrity and confidentiality are a given for **qualityaustria** auditors. They comprehensibly contribute to company success within the context of this philosophy. The benefit of the Integrated Management System is reinforced with the recurring audit, which is to be understood as a constructive intervention.

● qualityaustria network partners

AN INTERNATIONAL NETWORK

Quality Austria is nationally and internationally linked with prominent partners and keeps close relationships as well as mutual exchange with partner organizations such as CIS, AMA, ON and industrial clusters as well as IQNET, IPC, EFQM and many more.

We cooperate with around 50 partner and member organizations worldwide and thus ensure the facilitation of global know-how. Thanks to regional managements, Quality Austria is nowadays also represented by competent contact persons onsite in Eastern and Southern Europe, North Africa, Asia and South and Central America.

Benefit from our up-to-date, sector-specific and global know-how and choose a reliable partner for almost every region in the world.

For more information visit us at www.qualityaustria.com/en/international.

FIELD-TESTED AND COMPETENT: OUR AUDITORS AND TRAINERS KNOW WHAT THEY ARE DOING

Having more than 1.000 auditors, trainers, assessors and technical experts all over the world, we secure the successful implementation of standards and regulations within the organizations and provide sector and product specific knowledge with a very high focus on practical relevance. More than 10.000 customers in approx. 30 countries and over 6.000 annual participants in our trainings benefit from the long-standing expertise of our organization.

Through our work in bodies active at international and national level and years of experience our clients can rely on an extensive network of competence.

We influence trends, interpret innovation and shape norms actively – therefore, **qualityaustria** clients can always count on being up-to-date and on having competent auditors, trainers, assessors and experts by their side.

We support you by focusing on your long-term goals!

IMPARTIALITY

Quality Austria is aware of the importance of impartiality when acting as a certification body. In order to guarantee objectivity when conducting certification activities, the handling of potential conflicts of interest has been included in the management system of Quality Austria.

qualityaustria EVENTS

We see ourselves as a creator of networks and are pleased to invite you, in addition to our annual industry events in the areas of food safety, health and environment and energy, to our 28th **qualityaustria** forum on March 22, 2023. Be part of the hybrid event and decide for yourself whether you want to participate on site in Salzburg or remotely via PC or laptop.

We live in a world of change. Our (working) world is becoming increasingly dynamic, faster and more complex. Staying on or serving the market is more challenging than ever. How can we prepare ourselves for a future, where the deck of cards keeps on shuffling? The good news is, that the future is shaped by people. Therefore, the person needs to take center stage. In the course of our forum we will focus on future deciding factors such as a contemporary corporate culture, forward-thinking leadership strategies, changing customer expectations as well the significance of an Integrated Management System.

Integrated Management System

Integration offers many advantages: clear and coordinated responsibilities and allocation of tasks, providing a better overview of the entire system in the organization and as a consequence cost optimization. Integrated audits are the means for the certification of integrated management systems. It is not only possible to reduce effort significantly through the combination of models, but a much broader view of the company can be taken and with this even more useful recommendation to its further development can be identified. The entire field of integrated management is presented and trained in the **qualityaustria** courses on a highly effective basis, demonstrating how an optimal integration and at the same time an effective and efficient implementation of each separate system can be set up. In addition, participants benefit from credit transfer opportunities and thus already use synergies in the sense of integration during the training.

TRAINING AND CERTIFICATION OF PERSONS

- Course Quality Management Representative and Internal Auditor – Compact
- Preparation for the Auditor Examination

International training program

- Compact course Internal Auditor – Compact
- Course series Integrated Management System
- Course series Auditor
- Course series Lead Auditor

The implementation and application of an occupational health and safety management system (OH&S) is a significant help in the controlling and steering of work protection, health and safety risks. By using an occupational health and safety management system it is possible to reduce absences resulting from sickness and also from accidents at work. Moreover the management system is linked to a considerable improvement of legal certainty.

With an OH&S management system, safety and health protection activities in the company are systematized and integrated into operational processes. By actively involving employees, work-related risks are identified and reduced or prevented with preventive measures.

A **qualityaustria** Certificate verifies that internal corporate processes have been checked and are in compliance with the relevant standard for occupational health and safety.

SYSTEM CERTIFICATION, VERIFICATION AND VALIDATION

- ISO 45001
- SCC (Safety Certificate Contractors) (SCC*, SCC**, SCC[®])
- SCP
- AUVA-SGM (Safety and Health Management System of the Austrian Social Insurance for Occupation Risks)
- Legal Certainty for Occupational Safety

Quality management in construction has become an absolutely essential requirement. Virtually all medium sized construction companies and particularly large enterprises are already engaged in the further development of their Integrated Management System by supplementing it with requirements from risk management (ISO 31000 or ÖNORM D 4901), compliance management (ISO 37301) and anti-corruption management (ISO 37001).

Standards, norms, laws and regulations: EN 1090
Area of application: Construction and construction related industries
Notified since: 12/2012
Proof: Entry in the NANDO-list under number 1346

(excerpt)

Quality management as a strategic success factor is becoming more and more important in public administration. The decisionmakers in politics and administration have realized the enormous opportunities yielded by modern quality management systems for a long time.

No matter whether it is a question of establishing a successful management tool or of turning from a body enforcing standards and laws and regulations while focusing on execution of the law to a citizen and customer focused service provider. Or of simplifying or accelerating procedures and proceedings when modernizing administration and of thus taking important systematic action for implementing the budgetary reform relatively easily, effectively and, above all, sustainably. By now public administrations like using quality management systems – above all ISO 9001 – as extremely helpful implementation tools. Furthermore, further development towards integrated management systems and particularly dealing with the environmental management system acc. to ISO 14001 are becoming more important.

SYSTEM CERTIFICATION, VERIFICATION AND VALIDATION

An automobile is a highly complex and safety relevant product. As a rule, defects in production will have serious consequences and cause high costs. In order to prevent this, the automotive industry is trying to avoid this risk by imposing stringent rules and enormously high quality requirements on all the suppliers.

Quality Austria has already been intensively involved in this process by the manufacturers and associations since 1995 and offers all the required certifications or recognized trainings in order to enable the companies to meet these high requirements. In addition to the products mentioned below, we are also pleased to be at your disposal for special solutions and inquiries.

SYSTEM CERTIFICATION, VERIFICATION AND VALIDATION

Your way to a certification (System and product certification, verification and validation)

Information phase: Purchase of standards and regulations, attendance of information events and information talks, obtaining experience from already certified organizations.

Decision phase: Alignment of motivation for the management system and corporate business goals, estimate of internal resources and external costs, schedule creation.

Conceptual phase: Acquisition of internal know-how (e.g. **qualityaustria** training), elaboration of company specific standard interpretation, elaboration of scope of the management system, specification of corporate vision and policy, creation of the company specific process model.

Implementation phase: In-depth process analysis and modelling. Optimization and implementation of a characteristic system, process and product variables and a coherent system documentation. Conduct of internal system audits and initial review of the management system.

Operational phase: Taking corrective and preventive action, improvement projects, identification of system effectiveness through internal system audits and management review.

Our certificate: The **qualityaustria** Certificate is regarded as evidencing conformity and serves for enabling internal and external communication of a successful certification.

Phase for further development and improvement: Philosophy of continual improvement: establishing and communicating strategic goals relating to further development.

Medical Devices

The medical device technology as well as the medical device sector show a high level of innovation. Hundreds of new products are approved weekly, so that existing laws and regulations appear in a new light and creative implementation strategies are required.

ISO 13485 provides an international standard for enabling manufacturers of medical devices to evidence an effective quality management system. This standard refers to all organizations that are operating within the supply chain or are involved in placing devices on the market regulated by the relevant EU regulations (MDR, IVDR).

SYSTEM CERTIFICATION, VERIFICATION AND VALIDATION

- ISO 13485
- GDP and GMP

Sustainability and Environmental, Social, Governance (ESG) Management is an issue of increasing relevance in integrated system management. Worldwide, there are more and more laws that oblige companies to demonstrate performance in certain sustainable areas and thus to assume more responsibility along the entire value chain. Companies that want to expand or maintain their market position should therefore address the potential impact of their own activities on the environment and society.

Circular Globe

Think about tomorrow today

Circular Globe is a European initiative of Quality Austria and SQS. The Circular Globe Label, a guideline and assessment model, serves as a compass to drive progress: in planning, implementation and not least in visualization. In our training, we teach participants how to assess the starting position of their organization, identify potentials and derive feasible projects. In this way, the Circular Globe Label makes visible how companies and consumers make sustainable, circular decisions today for tomorrow - for the benefit of future generations, the environment and the economy.

Further information at:

www.circular-globe.com/en

Excellence (EFQM)

Business excellence runs like a golden thread through the daily business of an organization: It is reflected in customer satisfaction, the employees' loyalty, an organization's innovative power and outstanding business results.

Organizations with a high business excellence are continuously achieving outstanding performances and will thus fulfill or exceed the expectations of their stakeholders.

- The design of business excellence will have a positive effect on the **long-term success** of the organization – independently from size, sector or whether it is a profit or non-profit organization.
- An increase in business excellence will demonstrably yield **economic success and sustainable positive results**.

AUSTRIAN EXCELLENCE AWARD

The Austrian Excellence Award stands for success, enthusiasm and courage!

The Austrian Excellence Award is the award for the excellent organizations of Austria.

The quality of each organization participating will be increased. Based on the EFQM Model (European Foundation for Quality Management), the strengths and areas of improvement are identified and the excellence level is emphasized.

An assessment is the ideal opportunity for promoting organizational development in a structured manner.

Participate at the Austrian Excellence Award! For more information please refer to www.staatspreis.com (German).

ASSESSMENTS

All Assessments are carried out in accordance with the EFQM Model 2020:

- Committed to Excellence Validation / Validated by EFQM
- Committed to Excellence Assessment / Qualified by EFQM
- Recognised for Excellence / Recognised by EFQM
- Innovative Audit Excellence Check

We are currently experiencing a massive acceleration in digitization. Not only is our daily life being shaped by a new way of learning, working and communicating with one another, but new business ideas are also sprouting up faster and falling on fertile ground. Information security is of particular importance in this context. In order to support you in the best possible way, we have intensified our cooperation with the renowned CIS Ltd.. You benefit from proven expertise and holistic approaches.

The digital transformation of our working world offers many opportunities that can now be realized more quickly than many previously thought. However, new strategies for the digital economy are now also required. New business models and solutions are emerging in order to shape the networked future in the best possible way. The possibilities are endless, but information and data security should always be a top priority.

CEO CIS - Certification &
Information Security Services GmbH
harald.erking@cis-cert.com

As a recognized certification body, CIS is specialized in information security, IT services, cloud computing, data center as well as business continuity management. The excellent reputation of CIS certifies nationally and internationally as well as among public authorities and customers is regarded as a real competitive advantage and a door opener in business cases worldwide. The reason for this is the high quality of CIS accreditation awarded by the Federal Ministry for Labour and Economy (BMAW) as well as the proven certification procedure. A CIS Certificate will not only provide an organization with an independent review of its process management system, CIS auditors also actively provide their in-depth technical knowledge during the preparations for certification as well as the subsequent audits.

Customized Products for Special Industries

We are continuously updating our proven certification models by adding new standards used in specific sectors. Once again integration of management systems is our main concern. In addition to the specific technical standards, **qualityaustria** auditors are usually qualified in several additional management system standards or models. Thus we support our customers in establishing and improving specific tailored management systems and acknowledge the effectiveness of their systems by certifying them.

SYSTEM CERTIFICATION, VERIFICATION AND VALIDATION

- AS/EN/JISQ 9100/9110
